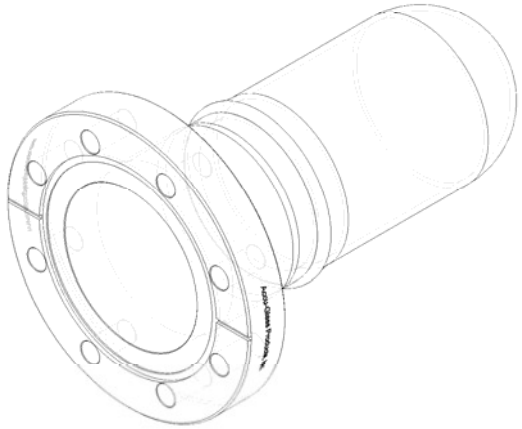
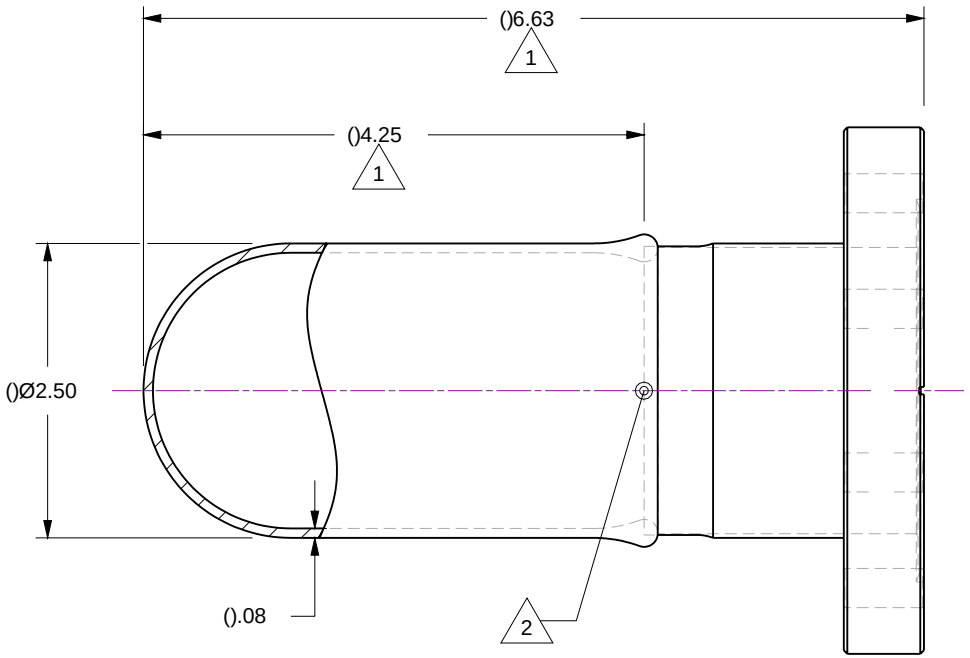
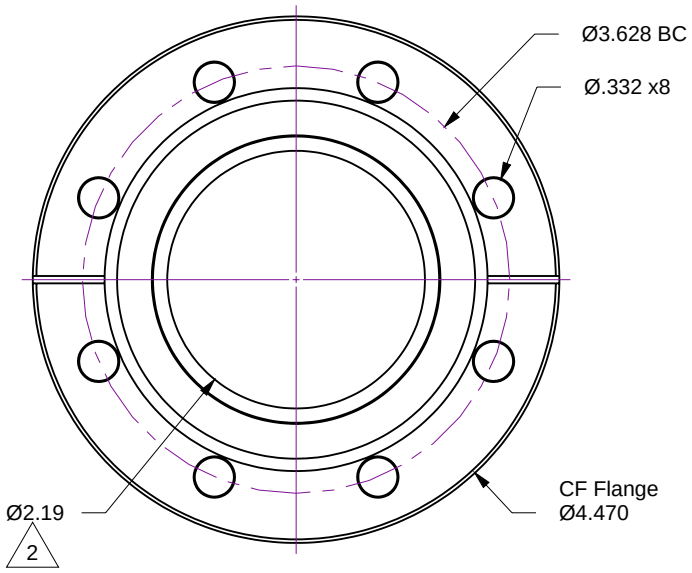
Notes

1. *** Although a highly specialized technology, glass-to-metal sealing and fabrication is more of an art than a science. As such, glass dimensions are nominal and only provided for reference. Note that glass lengths, diameters, and/or wall thicknesses can vary significantly from part to part. For example, glass adapter lengths can vary by as much as +/- 0.13 inch (3.3mm)***

2. Glass-to-metal interface diameter is smaller than that of metal or glass tube IDs. Objects inserted through this region must not exceed a 2.19 inch diameter.







COLEGLASS
